

Do you have the latest app?

It's free! It'll make you smile! It will keep your congregation connected!

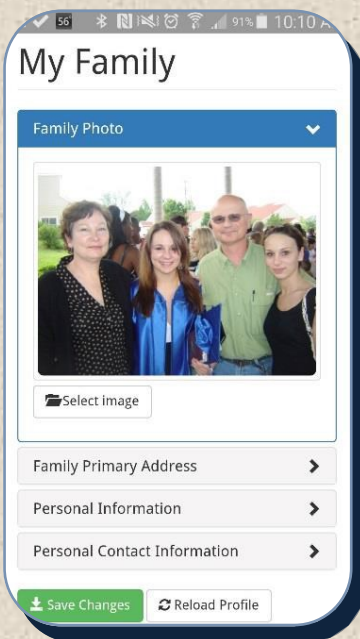

Because your church is already a user of the RDS Connect cloud-hosted system, we offer the Unite app included as part of your RDS cloud system. The best part is you already have this!

Just look what having the app, called "Unite," can do for your church:

Photo Directory:

- See a photo directory with phone numbers, cell phones, email addresses, and more.
- See maps of other members' homes, along with driving directions.
- Tap the phone number within the app to make a phone call or send a text.
- Members can install their own family photo.

Contribution Records:

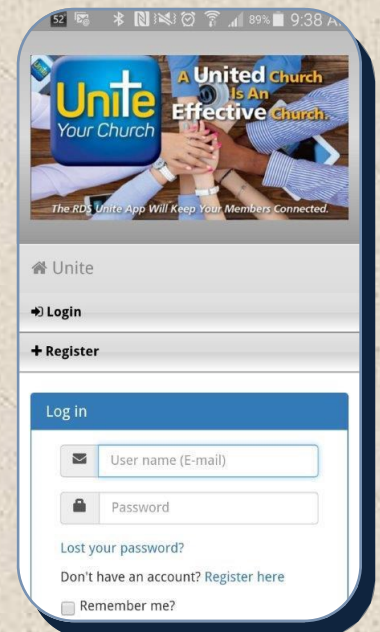

- Members can see a record of their own contributions for the previous year and year-to-date.
- Members can make new contributions by credit or debit card or ACH (Automatic Clearing House) using their own bank account.

Family Information:

- Members can see and update family information for primary address, personal information and personal contact information.
- Members can choose to not have their addresses or phone numbers published in the on-line directory.

My Account

- Members can update their own family account password.

As a part of our commitment to serve churches, we want every church we serve to be able to have these features. We believe Unite can help churches respond to the Great Commission by assisting pastors, staff, and members in their personal and corporate witness.

More features will be added to Unite in the coming months!
